**Attachment 1B – Advice Notes**

---

A.	This Concurrence Agency Response does not represent a development approval for Building Works under the <i>Building Act 1975</i> .
B.	All building works the subject of this notice can only proceed once a development permit for building works is issued by a Building Certifier.
C.	Please note this amenity and aesthetics assessment pertains to the approval of a class 10 building only (defined as Domestic Carport, Shed and Garage (10a)). It is recommended that clarification from a Building Certifier be sought to ensure that an appropriate building classification is applied to align with the building size, purpose, use and intent of operations within the building.
D.	Prior to any alteration or modification of a building, it is recommended that an inspection be undertaken of the resite/removal dwelling or building by a qualified person/s to determine the existence of Asbestos Cement Material (ACM), Asbestos Cement Products (ACP) or any other material not deemed as an acceptable construction material as defined in the Australian Standards or the Building Code of Australia.

## **Attachment 2 – Reasons for decision to impose conditions**

---

The reason for this decision are:

- To ensure the development is carried out generally in accordance with the plans of development submitted with the application.
- Under *Planning Regulations 2017* Schedule 9, Division 2, Table 7, Council can set an amount for security of the works and the *Building Act 1975* s93 allows for the security to be release. The amount of this security bond has been set by the North Burnett Regional Council under Council resolution adopted on the 15 June 2016.
- The currency period for a resited structure is legislated by the *Building Act 1975* s71(3)
- The Amenity and Aesthetics policy adopted by North Burnett Regional Council on the 4 November 2016 states that matters for consideration are to be the architectural style, building form, construction materials and physical condition of the proposed dwelling complements existing houses in the locality and surrounding pattern of development.
